

Here is a Step by Step Guide, how to develop the .doc files my Apps generate to a usable presentation.

I am using the Deinonychus.doc as an example.

When you open the file for the first time, you are going to get the following pop-up in Word.

Word has a problem to correctly identify the ASCII code, so it will ask you for help. I found that the Portugese coding works best, so just hit „P“.

Now, this looks better, doesn't it. Now only hit OK to get this:

Deinonychus									
STRENGTH : 11 1 DEXTERITY : 10 1 ENDURANCE : 12 2									
INTELLIGENCE 3 -1									
ARMOR : 1 Move : 13 Weight: 85 kg Range:									
C,1 2+									
3,4 - 5 Skull 34 12 - 1 Left Arm									
10	5 - 3 Face 34 13,14 - 1 Left Leg								
11	6,7 - 1 Right Leg 11 15 - 3 Hand								
10	8 - 3 Right Arm 10 16 - 3 Foot								
10	9-11 + 0 Torso 11 = Groin 34 17,18 - 3 Neck								
34									
MINOR o o o o o o o o o o o									
WOUNDED o o o o o o o o o o o									
SERIOUS o o o o o o o o o o o									
Vision-5, Smell-4, Hearing-4, Stealth-4, Melee-5									
1D6 1 2 3 4 5									
6									
Teeth 1 3 5 6 8									
10									

Well, not quite there yet. The size has to be adjusted. Just mark the whole text as I have already done and chose another font size. 9 is a good value to start with.

Deinonychus										
STRENGTH : 11		1	DEXTERITY : 10		1	ENDURANCE : 12		2	INTELLIGENCE 3 -1	
ARMOR : 1		Move : 13			Weight: 85 kg		Range: C,1 2+			
3,4	- 5	Skull		34	12	- 1	Left Arm		10	
5	- 3	Face		34	13,14	- 1	Left Leg		11	
6,7	- 1	Right Leg		11	15	- 3	Hand		10	
8	- 3	Right Arm		10	16	- 3	Foot		10	
9-11	+ 0	Torso 11 = Groin		34	17,18	- 3	Neck		34	
MINOR o o o o o o o o o o o										
WOUNDED o o o o o o o o o o o										
SERIOUS o o o o o o o o o o o										
Vision-5, Smell-4, Hearing-4, Stealth-4, Melee-5										
1D6	1	2	3	4	5	6				
Teeth	1	3	5	6	8	10				
<p>A large coelurosaur, Deinonychus reaches lengths of up to 10 feet. On each foot, it has a large forward-mounted claw used for disemboweling opponents. The forearms are also heavily clawed. Treat the feet as the main weapon, kicking at close or 1-hex range for impaling damage. It attacks large prey by leaping at up to 2-hex range. Deinonychus can also bite and claw in close combat for 1d cutting damage. Common in the Cretaceous, it inhabits dry flood plains and river banks</p>										

Now it looks a bit more like the real thing. Just fiddle with fonts and sizes until it is to your liking.

Deinonychus

Deinonychus can also bite and claw in close combat for 1d cutting damage. Common in the Cretaceous, it inhabits dry flood plains and river banks</p>										

I personally like the LiberationMono font very much, so I usually include it with the App.

Now we need a better font for the creatures name, I use Avengence or Arial Rounded MT Bold, and of course a picture of the critter. Both can easily be found via Google search.

DEINONYCHUS

A large coelurosaur, Deinonychus reaches lengths of up to 10 feet. On each foot, it has a large forward-mounted claw used for disemboweling opponents. The forearms are also heavily clawed. Treat the feet as the main weapon, kicking at close or 1-hex range for impaling damage. It attacks large prey by leaping at up to 2-hex range. Deinonychus can also bite and claw in close combat for 1d cutting damage. Common in the Cretaceous, it inhabits dry flood plains and river banks

Finally just save the file as a PDF and convert it to a .JPG. I use Picasa 3, which is free. Just Google it.
